

Alphabet Book

Materials:

- Construction paper or regular bond paper
- Scissors
- Glue
- Crayons or markers
- Magazines to cut out pictures, or draw your own pictures!
- Stapler or hole punch and ribbon to bind the book

How to Make It:

Download the alphabet letters to your computer, and print out the letters you want. You can choose just the letters of your name, or the whole alphabet!

Color the letters with crayons or markers, then carefully cut out the letters.

Glue each letter to a sheet of paper, leaving lots of room to glue your pictures. Remember to leave a small area on the left edge for your binding.

Cut out pictures of things or words that start with the letter on your page. Or, you can draw your own pictures.

Glue them all around your letter, leaving about 1/2-inch on the left side for your binding.

When you've finished all your letters, and everything is dry, either staple them all together on the left side, or punch holes and tie a ribbon around to hold the papers together.
